Available for inspection and selection in Graphics Register are five photos of quay and warehouse facilities at Paranagua, Brazil. These photos were taken 8 April 1953 approximately 3/8 mile from the quay at Paranagua. Photos (1) and (2) show the present status of construction of the northeasterly extension of the old quay.

Dredging to deepen Canal do Sul to 30 feet will soon begin; this channel will eventually be used as the primary entrance to the port.7
